

Case Study

RS50x60 NI | Townsend Way, Malvern

Project: Traffic Signal Refurbishment
Product: RS50x60 Non-illuminated
Client: Worcestershire County Council

RS50x60 NI | Townsend Way, Malvern

The NAL Retention Socket system was chosen by Worcestershire County Council for the installation and future-proofing of a guardrail on a Puffin crossing in Malvern.

In the event of a knockdown the Retention Socket allows the damaged guardrail to be removed and replaced in as little as 12 minutes saving the local authority time and money. By removing the need for excavations and requiring minimal TM, disruption to the public is kept to a minimum allowing normal operation to continue.
