Installation Guide
Battery Illuminated Bunting System

Step 1 - Install IP66 power unit into base enclosure and lock if required.

Step 2 - Secure the end of the illuminated string to cantilever arm with spring clip.

Step 3 - Secure illuminated string with tie wraps onto the cantilever, and through the spring clip.

Step 4 - Erect the telescopic Guardian Goalpost System, installing a minimum of one tie wrap between each telescopic bracket.

Step 5 - Secure the illuminated string with a final tie wrap at the bottom of the goalpost.

Step 6 - Connect the illuminated string into the power unit, creating a drip loop.
